

**RHEUMATISM.**

Torturing, grinding, rasping, aggravating pain! Let it come in the guise of Lumbago, Sciatica, Muscular, Inflammatory, "Come and Go"; in the joints, in the chest, in the back; anywhere, I will cure it. My Electric Belt goes to the spot and drives it out of the body. It relieves the pain in an hour and cures the worst cases in a week.

**Dr. McLaughlin's Electric Belt**

Has cured thousands of Rheumatics. It will cure you.

**Rheumatism Cured.**

Dr. McLaughlin—Dear Sir: About one month ago I began the use of your belts for the cure of rheumatism, having suffered with it for three years, and after having tried all kinds of medicines and doctors, and being compelled to change my residence from Amador county. I began to improve immediately after three days' use of the belt, and have continued to do so since. It has done good work for me. I now get up in the morning feeling fresh and rested, instead of that tired, worn feeling, and have increased greatly in weight. I feel better in every respect, and have your belt to thank for it. You may use this letter as you see fit. Yours very truly,

WILLIAM H. O'NEIL,

137 Jessie St., San Francisco, Cal.

FREE TEST I want every sufferer from Sciatica, Rheumatism, Lambe Back, Kidney or Bladder Troubles, General Nervousness or Vital Weakness, Indigestion, etc., to test my Belt free at my office. If you can't call, send for my book about it, free. Inclose his ad.

**Dr. M. G. McLaughlin,** 702 Market Street, Cor. Kearny, San Francisco. Office Hours:—A. M. to 8:30 P. M. Sundays, 10 to 1.

## WILL STUDY IRRIGATION

### Jared Smith's New Mission in Hawaii.

### FINE COFFEE ON OTHER ISLAND

### Attempt Will Be Made to Grow French Pistachi Nut at Experiment Station.

The irrigation of Hawaii is the next study which is to occupy the attention of the Department of Agriculture. Jared Smith, on his return from Hilo, found a letter awaiting him from Elwood Mead, in charge of the irrigation bureau of the Agricultural Department at Washington, transferring him to that service. His new duties begin on the first day of January, and he will work under the direction of the irrigation bureau for the first two months of the new year.

Exactly what the scope of the study of irrigation in this Territory is to be is not disclosed in the letter from Mr. Mead. Detailed instructions are coming later, probably by tomorrow's mail.

The investigation will be scientific, and will take in the methods of pumping water on the small farms, and for homes, though no doubt the methods used by the big sugar plantations in the development of their water supply, will receive some attention.

In the course of his investigations, Mr. Smith will make a tour of the other Islands, though his plan of campaign has not been entirely mapped out, as yet.

His investigation will take in the best methods of irrigation, the use of fuel and machinery for the purpose, and how the system in Hawaii may be improved. Mr. Smith will continue in charge of the work of the experiment station, even though nominally under the direction of the irrigation bureau. This plan is adopted by the department, no doubt, in order to save the expense of sending a man to Hawaii with special instructions to study irrigation, as Jared Smith is already on the ground and can secure the same information, as might be obtained from sending an expert, and at considerably less cost to the government.

### WILL REPORT TO WASHINGTON.

On the steamer America Maru, which leaves for the Coast on the 20th of this month will go forward to Washington a very complete report of various agricultural industries in these Islands. This report was asked for by Director True, who is in charge of the experiment stations in all parts of the United States, and is probably compiled for the benefit of Congress, now in session. Separate reports are to be made on coffee growing, the rice industry, fruit raising, taro cultivation and vegetable farming. The report was asked for by telegraph, so, evidently the Washington department is in a hurry to get it.

### FAVORS COFFEE CULTIVATION.

Mr. Smith will report favorably upon the coffee industry in these Islands, as the result of his investigations in Hawaii. He made a thorough investigation of the Hamakua district, visiting the Barnard, Horner and Lewison plantations. In Oahu, Mr. Smith reports that he found most of the coffee plantations had been abandoned. "There is a good deal of fine coffee land on Hawaii," said Mr. Smith yesterday, "and there can be no doubt of the success of the cultivation of coffee. The only question is the financial one, for coffee can be raised there, and the finest in the world, too. A friend of mine who has been all through South America, was along, and said he had never seen finer coffee anywhere. On all these plantations the coffee was the best I had ever seen, and the trees were loaded down with the bean. The coffee grown in the Hamakua district is the finest in the world. The price of coffee is so low now that it doesn't pay, and the people on that Island believe that the United States should put a protective tariff on coffee, in order to protect the industry here."

Mr. Smith spoke very enthusiastically both of the coffee and sugar plantations, and the general vegetation on Hawaii. Particularly was he impressed with the growing cane on the Coast, and spoke of one solid field over sixty miles long, which could be seen from the Kinau's deck.

### WILL GROW PISTACHE NUTS.

About eighty pounds of pistache nuts have been received at the Tantalus experiment station and will be planted immediately. The nuts were imported directly from France, and Mr. Smith will attempt to grow the fruit on prepared soil at the station. The nut is bright green in color, and is extensively used by confectioners for flavoring candies, ice cream, etc. In the United States it sells for from \$1.50 to \$2.00 per pound, and if it can be successfully grown here will prove a very profitable industry for the Islands.

By the last steamer ships of Georgia peach trees and Missouri grapes, and

of gooseberries and hemp seed were received, all to be planted at the experiment station.

### Cardinal Grosbeaks Here.

Eben Low, manager of the ranch at Puuwaawaa, Hawaii, received on the Sierra twenty cardinal grosbeaks of the Southern States variety. The birds are said to be bug-hunters, and they will shortly be given their trial at the ranch. They are said not to harm crops or plants. The birds are beautifully plumaged and the male bird gives vent to a piercing note similar to that of a high note on a piccolo. The birds are smaller than the mynah. More grosbeaks may be imported if the present lot are proven beneficial in the Hawaii forests.

### PAINEFUL.

Yesterday morning a warrant was issued for the arrest of one of the drivers of Pain's arks, who is alleged to have been the cause, one day last week, of an accident in which Mrs. Frank Davey was thrown out of a hack and severely injured.

It appears that the car collided with a dray, which in turn ran into a hack nearly upsetting the latter vehicle. Criminal carelessness on the part of the charioter is alleged.

About 9 o'clock on Sunday night one of Pain's market wagons ran into a Rapid Transit car on King street, near Liliha. The collision resulted in the decrepit mullet van having a side stove in. No noticeable impression was made on the electric car.

## At Auction

ON FRIDAY, DEC 20, 1901, COMMENCING AT 10 o'clock a. m.

I will offer for sale at public auction, upon the premises, being the southeast corner of Wilder avenue and Makiki street, the entire
